MULTI-INFORMATION DISPLAY

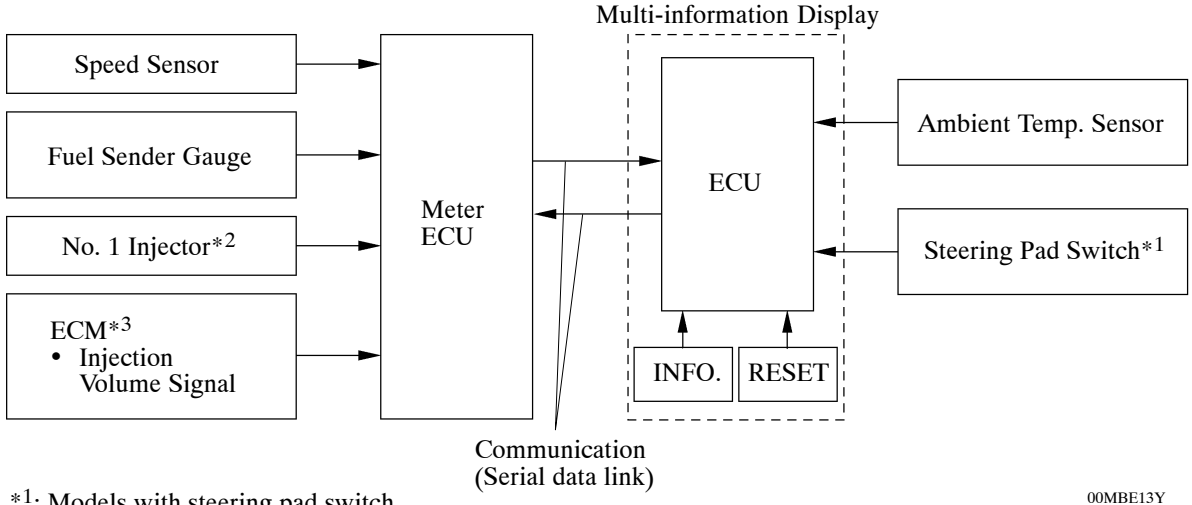

■ DESCRIPTION

- The new Fortuner/Hilux SW4 uses a multi-information display. For details on the provision, see Equipment List on page MO-23.
- The display functions of this system can be changed by pressing the INFO. switch on the display panel or the steering pad switch*1.
- The following pieces of information appear on the multi-information display: clock, ambient temperature, average fuel consumption, instant fuel consumption, average vehicle speed, elapsed time, drivable distance, and compass. The ECU, which is built into the multi-information display, causes these pieces of information to appear on the display in accordance with the information signals provided by the meter ECU and sensors.
