DOOR LOCK CONTROL SYSTEM

■ DESCRIPTION

- The new Fortuner/Hilux SW4 uses a door lock control system. For details on the provision, see Equipment List on page MO-23.
- The door lock control system is controlled by the body ECU. However, some functions are controlled by the theft warning ECU*1, which transmits the door lock/unlock signals to the integration relay.
- This system has the following functions:

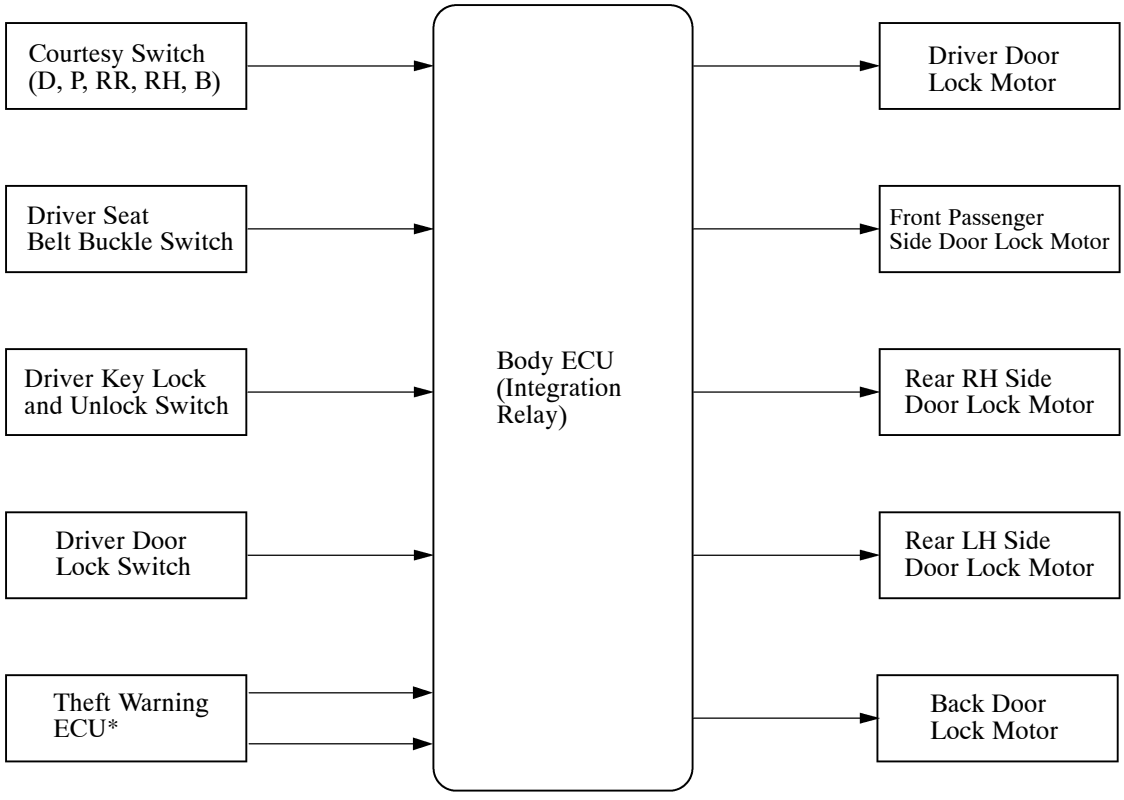

Function	Outline
Key-linked Lock and Unlock	This function, which is linked with the driver's door key cylinder, can lock or unlock all doors when a lock or unlock operation is effected while the driver's seat belt is not fastened.
Manual Lock and Unlock	This function can lock or unlock all doors by the door lock control switch of the driver operation.
Speed-sensitive Automatic Door Lock*2	• This function is controlled by the theft warning ECU*1 • All doors will be locked when all doors are closed and the vehicle reaches a speed of 25 km/h. • This function can be disabled together with the ignition switch-linked automatic door unlock function, according to user preference. For details, refer to the Fortuner/Hilux SW4 Repair Manual.
Ignition Switch-linked Automatic Door Unlock*2	• This function is controlled by the theft warning ECU*1 • After all doors are locked through the operation of the speed-sensitive automatic door lock function, turning the ignition switch OFF will automatically unlock all the doors. • This function can be disabled together with the speed-sensitive automatic door lock function according to user preference. For details, refer to the Fortuner/Hilux SW4 Repair Manual.
Door Lock with Transmitter (see page BE-74)	Pressing the lock button of the transmitter locks all doors.
Door Unlock with Transmitter (see page BE-74)	Pressing the unlock button of the transmitter unlocks all doors.
