WIRELESS DOOR LOCK CONTROL SYSTEM

■ DESCRIPTION

- The new Fortuner/Hilux SW4 uses a wireless door lock control system. For details on the provision, see Equipment List on page MO-23.
- This system is a convenient system for locking and unlocking all the doors, at a distance.
- A key-integrated, two-button type or three-button type* transmitter is used.
- The functions of the wireless door lock control system on the Fortuner/Hilux SW4 differ between the models with and without the theft deterrent system.
- On the models with the theft deterrent system, the door control receiver is integrated in the theft warning ECU.
- The door control receiver performs the code identification process and the body ECU effects the door lock control.
- On the models without the theft deterrent system, a serial data link is provided for establishing communication between the door control receiver and the body ECU.
