SUSPENSION AND AXLE

■SUSPENSION

1. General

The double-wishbone type independent suspension for the front and 4-link coil spring with lateral rod type rigid axle suspension for the rear are used on the new Fortuner/Hilux SW4.

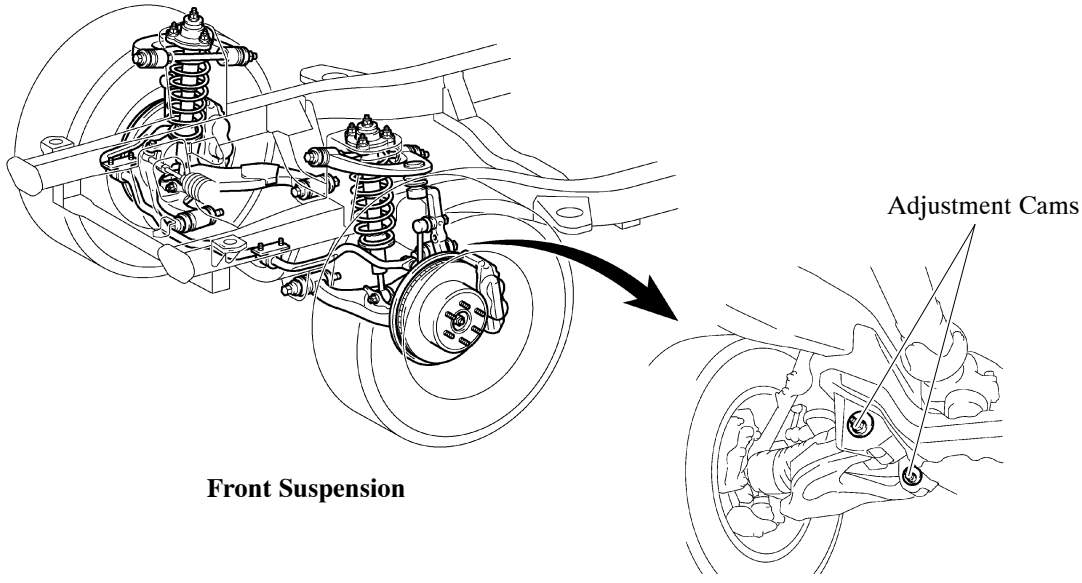

280CH51

4WD Model

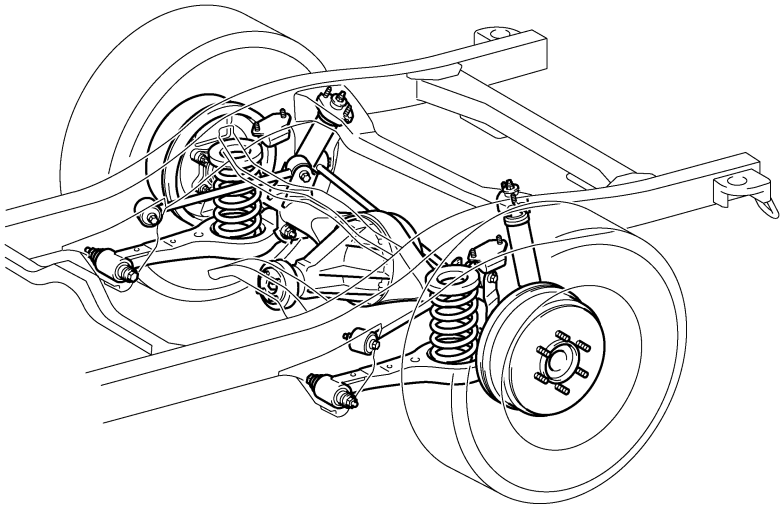

2. Front and Rear Suspension

Through the optimal allocation of components, the front and rear suspension provides excellent riding comfort, controllability, and off-road drivability.

Front Suspension

Rear Suspension

Service Tip

The camber and caster of the front suspension are adjusted at the adjustment cams of the lower arms, and the toe-in is adjusted by changing the lengths of the tie-rod ends.
For details, refer to the Fortuner/Hilux SW4 Repair Manual.
