Combination Meter

- The combination meter is a unique, triple-dial type. It expresses both sportiness and powerfulness.
- The 2 types of combination meters shown below are available, depending on destination and engine of the vehicle. For details of provision, see Equipment List starting on page MO-23.

00MBE48Y

Optitron Display Type
(Models for Thailand with 1KD-FTV Engine)

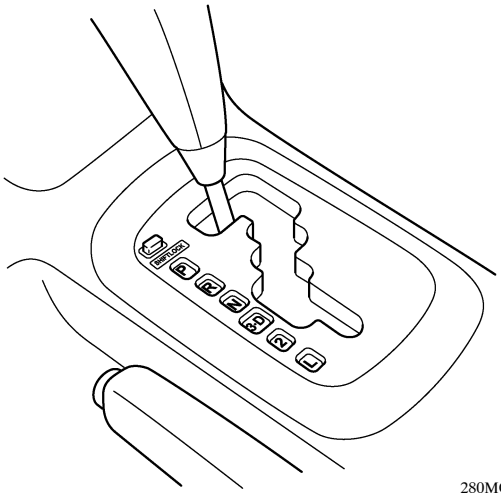

00MBE49Y

Analog Display Type
(Models for South Africa with 2TR-FE Engine)

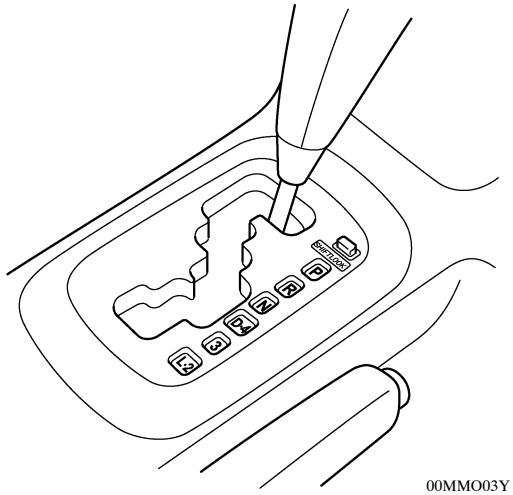

Shift Lever (Automatic Transmission)

A gate type shift lever is used. The functions of the shift button and the overdrive switch can be operated by merely moving the shift lever sideways, and the shift feel has been improved.
